DREXEL ENDOSULFAN 3EC
EPA REG. NO. 19713-399
EPA SLN NO. WA-980012

SUPPLEMENTAL LABELING

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

This label must be in the possession of the user at the time of application.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Alfalfa Grown for Seed
For control of Spotted alfalfa aphids and Lygus bugs, apply 1.33 quarts of Drexel Endosulfan 3EC per acre. Apply in a minimum of 10 gallons of water per acre by air or in a minimum of 25 gallons of water per acre by ground.

Apply when insects first appear.

RESTRICTIONS
• Do not make more than 2 applications per season.
• Do not apply within 21 days of harvest.
• All Alfalfa seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter or other equivalent disposal site and shall include the lot numbers, amounts of material disposed of, the grower(s), and the date of disposal. No portion of the Alfalfa seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
• Alfalfa seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
• Alfalfa seed may not be distributed for human consumption or animal feed.
• Do not use more than 1.33 pints per acre during bloom.
• For use under this SLN label, do not apply this product through any type of irrigation system.
• This product is toxic to bees exposed to direct application. Do not apply this product to blooming seed crops if bees are visiting the treatment area. Applications to blooming seed crops must be timed to coincide with periods of minimum bee activity, between late evening and midnight.

This pesticide is toxic to fish, birds and other wildlife. Drexel Endosulfan 3EC must not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/EnvResources/EndangSpecies.htm, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms. Due to the risk of runoff and drift, do not apply within a distance of 300 feet of lakes, ponds, streams, and estuaries.
WSDA Container Disposal Guidance:
Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the internet from WSU at http://pep.wsu.edu/waste/wd.html or from WSDA at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

THIS LABEL FOR DREXEL ENDOSULFAN 3EC EXPIRES AND MUST NOT BE DISTRIBUTED OR USED IN ACCORDANCE WITH THIS SLN REGISTRATION AFTER DECEMBER 31, 2010.
