FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NEVADA

TILT®

EPA Reg. No. 100-617
EPA SLN No. NV-010004

For control of rusts (Puccinia spp.) powdery mildew (Erysiphe spp.) and selenophoma stem eyespot (selenophoma) in perennial ryegrass, fescues, bluegrass, orchardgrass and/or wheatgrasses grown for seed

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standards, on the EPA-registered Tilt label.

This labeling must be in the possession of the user at the time of application.

Grasses Grown for Seed

Mix 4-8 fl.oz. of Tilt (maximum 4 fl. oz. on bluegrass) in a minimum of 20 gals. of water per acre for ground application, or in a minimum of 10 gals. of water per acre for aerial application. Tilt may also be applied through irrigation equipment. Apply when powdery mildew and selenophoma infections or rust postules are noticeable and increasing in number, in late spring or early summer. Repeat at 14-21-day intervals. To maximize control under severe rust pressure, use the higher rate of 8 fl. oz./A (except on bluegrass), and make applications at 14-day intervals until the seed is mature. Do not apply more than 32 fl. oz. of Tilt per acre per growing cycle. Make the last application at least 20 days before seed matures. For bluegrass, it is important to begin application early in the growing season.
Precautions:

To avoid possible illegal residues, **DO Not** 1) feed hay cut within 20 days of the last application, or 2) graze treated areas within 140 days of the last application.
