DAGGER®

5.2 LB. MCPA ESTER HERBICIDE

FOR THE SELECTIVE CONTROL OF BROADLEAF WEEDS IN SMALL GRAINS, FLAX, GRASSES, RANGELANDS, PASTURES, AND NON-CROP AREAS.

ACTIVE INGREDIENT:
Isoxyl (2-ethylhexyl) Ester of 2-methyl-4-chlorophenoxyacetic acid* . . . . . 91.0%
OTHER INGREDIENTS: .................................................. 9.0%
Total ............................................................. 100.0%

*Equivalent to 2-methyl-4-chlorophenoxyacetic acid equivalent 58.4%, 5.2 pounds per gallon. Isomer specific by AOAC Method.

KEEP OUT OF REACH OF CHILDREN
WARNING - AVISO
Si usted no entienda la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)
See Inside Booklet for First Aid and Additional Precautionary Statements

For Chemical Spill, Leak, Fire, Exposure Call CHEMTREC (800) 424-9300.
For Medical Emergencies Only, Call 877-325-1840.

EPA Reg. No. 228-267-71368
EPA Est. No. 228-IL-1

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and change into clean clothing.

FIRST AID

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-325-1840 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

Drift or run-off may adversely affect nontarget plants. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate nor pour washwaters on the ground; spray or drain over a large area away from wells and other water sources. Do not apply this product through any type of irrigation system. Do not contaminate domestic or irrigation waters. Spray equipment used in applying this product should be thoroughly cleaned before using for any other purpose. Use repeated flushing with soap and warm water or suitable chemical cleaner. It is best to use a separate sprayer for application of insecticides and fungicides. This product will kill or seriously injure many desirable forms of vegetation. Do not apply directly to flowers, fruits, grapes, tomatoes, ornamentals, cotton or other desirable plants. Vapors from this product may injure susceptible plants in the immediate vicinity. Do not apply when weather conditions favor drift from target area. Avoid use of small-diameter nozzles. (Coarse sprays are less likely to drift.) Excessive amounts of this product in the soil may temporarily inhibit seed germination and plant growth.

Most cases of groundwater contamination involving phenoxy herbicides such as MCPA have been associated with mixing/loading and disposal sites. Caution should be exercised when handling MCPA pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING - AVISO
May be fatal if absorbed through skin. Harmful if swallowed. Do not get in eyes, on skin, or on clothing.

NON-WPS USES:
Applicators and other handlers who handle this pesticide for any use NOT covered by the Worker Protection Standard (40 CFR Part 170) – in general, only agricultural plant uses are covered by the WPS – must wear: protective clothing and rubber gloves.

WPS USES:
PERSONAL PROTECTIVE EQUIPMENT:
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category C on an EPA chemical resistant category selection chart. Applicators and other handlers who handle this pesticide for any use covered by the Worker Protection Standard (40 CFR Part 170) – in general, agricultural plant uses are covered – must wear: coveralls over short-sleeved shirt and short pants; chemical-resistant gloves such as Barrier Laminate, Butyl Rubber > 14 mils, Nitrile Rubber > 14 mils, Neoprene Rubber > 14 mils, Polyvinyl Chloride (PVC) > 14 mils and Viton > 14 mils; chemical-resistant footwear plus socks; chemical-resistant headgear for overhead exposure and chemical-resistant apron when cleaning equipment, mixing or loading. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining Personal Protective Equipment (PPE). If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls Statements: When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

For Medical Emergencies Only, Call 877-325-1840.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls over short-sleeved shirt and short pants, chemical-resistant gloves such as Barrier Lamine, Butyl Rubber > 14 mils, Nitrile Rubber > 14 mils, Neoprene Rubber > 14 mils, Polyvinyl Chloride (PVC) > 14 mils and Viton > 14 mils; chemical-resistant footwear plus socks, and chemical-resistant headgear for overhead exposure.

EFFECTIVENESS ON WEEDS: This product is effective on a large number of broadleaf weeds. On Mustard, Thistle, and White top or Hoary cress, it has superiority over 2,4-D. The following are some of the weeds killed: Beggarticks, Burcucumber, Burdock, Buttercup, Canada thistle, Carpetweed, Catsear, Chervil, Cocklebur, Croton, Daisy, Dandelion, Dock, Dragonhead mint, Dwarf nettle, Fanweed, Fat hen, Fennel, Field bindweed, Gallinsoga, Goatsbeard, Goldenrod, Halberleaved salt brush, Hempnettle, Hoary cress, Honeysuckle, Jimsonweed, Knotweed, Kochia, Lambsquarter (Goosefoot), Marshelder, Mexican poppy, Miner’s lettuce, Narrow leaf plantain, Nutgrass, Pennycress, Pepperweed, Perennial morningglory, Perennial ragweed, Pigweed, Poison hemlock, Prickly lettuce, Puncreutervine, Purslane, Red root, Redstem, Shepherds purse, Sicklepod, Small plantain, Sneezeweed, Sorvthistle, Spanish needle, Stingning nettle, Stinkweed, Sunflower, Thornapple, Tree-of-heaven, Vetch, Whitebush, Wild carrot, Wild gooseberry, Wild jute, Wild marigold, Wild petunia, Wild pink, Wild rocket, Wild radish, Wild sage, Witchweed, Yellow charlock-mustard, Yellow daisy, Yellow rocket.

SELECTIVE SPRAYING

NOTE: When using on grains and flax – do not forage or graze dairy and meat animals on treated areas within seven days of slaughter. Also, except for small underseeded grains, use at least 8 to 10 gallons of water per acre for ground application and at least 1 to 5 gallons of water per acre for aerial application.

SMALL GRAINS: Wheat, barley, Rye (For small grains underseeded with legumes, see the small grains paragraph below.) Spring planted – not seeded to legumes. Apply as a water mix spray by ground sprayer or airplane. Use 1/3 to 1 pint of this product per acre for the more susceptible weeds and up to 2 pints per acre for less susceptible weeds. Treat when fully tillered grains have reached 3 to 4 leaf stage (8 to 10 inches tall). Do not spray grain in the boot to dough stage. Fall Planted – Fall application – not seeded to legumes. The safest time to treat is when Fall planted small grains are fully tillered and have reached 3 to 4 leaf to the boot stage (8 to 10 inches tall). Infestations of broadleaf weeds germinating in Fall and Winter may, however, justify treatment at an earlier stage. Fall planted wheat, barley, or rye can be sprayed with 1/3 to 3/4 pint of this product per acre from the 3 to 4 leaf stage to the boot stage. Spring application – Apply in early Spring when annual broadleaf weeds are small and grain is fully tillered but before grain is in the jointed stage.

SMALL GRAINS – Underseeded with Alfalfa, Birdsfoot Trefoil, Lespedeza, Red and White Clover: For emergency control of serious infestations of Mustard, Yellow rocket, and other susceptible broadleaf weeds, apply 3 to 6 oz. in not more than 1 to 10 gallons of water per acre. Make application after cereal is well tillered (4 to 8 inches tall) and before reaching boot stage. The nurse crop and weeds should provide a protecting canopy which, together with the use of low gallonage applied at low pressure, will reduce the risk of damage to the legumes. Do not apply to small grains underseeded with Vetch or Sweet clover, which are very susceptible. There is also some risk to other legumes if only thinly protected by a canopy.

OATS: Spray after oats are fully tillered (4 to 6 inches tall) but before they are in the boot to dough stage. Apply the lower rate of 6 oz. where annual weeds are the problem, the higher rate of 3/4 pint for perennial weeds.

FLAX: Use 3 to 6 oz. per acre. Use lower rate where susceptible weeds such as Mustard are the main problem. Use higher rate when weeds such as Pigweed, Lambquarters, Stinkweed, Ragweed, Cocklebur are the problem. Apply only when weeds are up and when flax is 2 to 8 inches high and before it comes into bud. Treatment after early bud stage may result in severe damage. If Canada thistle is present, it may be necessary to go as high as 1/2 pint per acre to prevent seed head production. Some injury to flax may result.

RANGE AND TIMBER LANDS: For control of Whitebrush – Use 1 quart in mixture of 1 gallon of diesel oil and sufficient water to make 8 gallons of solution per acre.

Apply in Spring or Fall under good moisture conditions, full leaf, before blossoms begin to fall.

GRASSES: Established Lawns, Golf Courses and similar Turf Grasses–Use 3/4 to 2 pints per acre in 10 to 100 gallons of water to give thorough coverage. Use higher rate for White top and Canada thistle. On smaller areas use 3/4 fluid ounce (3 tablespoonsful) mixed in 3 to 5 gallons of water and apply uniformly over 2,000 square feet. Do not mow within 2 days before or after application. Spring and Fall are best times to treat. Do not use on lawns of creeping grasses, such as bent, except for spot spraying, nor on freshlyseeded turf until the grass has become well established.

Established Grassland and Pastures–Use 3/4 to 2 pints per acre in sufficient water (2 to 100 gallons of mixture) in airplane or ground spray application and give thorough coverage. Use higher rate for White top, Canada thistle and other less easy-to-kill weeds; spray perennialss in early bud to full bloom stage and regrowth in Fall. Other weeds in Spring or Fall.

Grasses Grown for Seed–Use 3/4 to 1-1/2 pints per acre in 1 to 50 gallons of water by air or ground sprayer application. Use higher rate where weed stands are heavy. In established grasses, apply in Spring before heat comes into boot stage and on seedling grass after grass has thinned.

NOTE: For weed control in grasses, repeat treatment may be needed for less susceptible weeds. White clover and other legumes may be temporarily injured or killed. In some areas, bent, buffalo, carpet, centipede, dichondra and St. Augustine may also be injured by the treatment.

NON-CROP SPRAYING: Canada thistle, White top and Meadow buttercup. (In Non-Crop Areas such as Roadsides, Fence rows, Rights-of-way and similar places): For spot treatment, use 3 oz. to 3 to 4 gallons of water or 1/2 gallon per acre in 12 to 20 gallons of water to give coverage for most extensive areas. Spray to wet weeds thoroughly when in bud to early bloom and again on Fall regrowth. Local conditions may affect the use of this chemical. Consult State Agricultural Extension or Experiment Station weed specialists for specific recommendations for local weed problems and for information on possible lower dosages.

NOTICE: Follow directions carefully. Timing and method of application, weather and crop conditions, mixing with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage and handling of the material not in strict accordance with direction given herewith.

STORAGE AND DISPOSAL

STORAGE: Always store pesticides in a secured warehouse or storage building. Containers should be opened in well-ventilated areas. Keep container tightly sealed when not in use. Do not stack cardboard cases more than two pallets high. Do not store near open containers of fertilizer, seed or other pesticides. Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. If container is damaged or if pesticide has leaked, contain all spillage. Absorb and clean up all spilled material with granules or sand. Place in a closed labeled container for proper disposal.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.
WARRANTY DISCLAIMER

CAREFULLY FOLLOW ALL LABEL DIRECTIONS, PRECAUTIONS AND WARNINGS FOR THIS PRODUCT. PLANT INJURY OR LOSS, LACK OF PERFORMANCE, OR OTHER UNINTENDED CONSEQUENCES MAY RESULT BECAUSE OF SUCH FACTORS AS USE OF THE PRODUCT CONTRARY TO LABEL INSTRUCTIONS, ABNORMAL CONDITIONS (SUCH AS UNFAVORABLE TEMPERATURES, EXCESSIVE RAINFALL, DROUGHT, TORNADOES, HURRICANES), PRESENCE OF OTHER MATERIALS, THE MANNER OF APPLICATION, OR OTHER FACTORS, ALL OF WHICH ARE BEYOND THE CONTROL OF THE MANUFACTURER AND THE SELLER. ALL SUCH RISKS OF LOSS OR DAMAGE SHALL BE ASSUMED BY THE BUYER. NUFARM, INC. NEITHER MAKES NOR INTENDS, NOR DOES IT AUTHORIZE ANY AGENT OR REPRESENTATIVE TO MAKE, ANY WARRANTIES, EXPRESS OR IMPLIED, AND IT EXPRESSLY EXCLUDES AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. BUYER'S EXCLUSIVE REMEDY AND MANUFACTURER'S OR SELLER'S EXCLUSIVE LIABILITY FOR ANY AND ALL CLAIMS, LOSSES, DAMAGES, OR INJURIES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER OR NOT BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE SHALL BE LIMITED, AT THE MANUFACTURER'S OPTION, TO REPLACEMENT OF, OR THE REPAYMENT OF THE PURCHASE PRICE FOR, THE QUANTITY OF PRODUCT WITH RESPECT TO WHICH DAMAGES ARE CLAIMED. IN NO EVENT SHALL MANUFACTURER OR SELLER BE LIABLE FOR SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. THE TERMS OF THIS WARRANTY DISCLAIMER AND LIMITATION OF REMEDIES CANNOT BE VARIED BY ANY WRITTEN OR VERBAL STATEMENTS OR AGREEMENTS. NO EMPLOYEE OR SALES AGENT OF THE MANUFACTURER OR SELLER IS AUTHORIZED TO VARY SUCH TERMS IN ANY MANNER.
