EPA Reg. No. 241-418  
EPA SLN No. WA-030037

FOR WEED CONTROL IN PERENNIAL GRASSES GROWN FOR SEED PRODUCTION

For application to established (6 or more tillers per plant) Kentucky bluegrass, tall fescue, orchardgrass, perennial ryegrass, bentgrass, fine fescue fields, or basin wild rye.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of application.

FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, AND PRECAUTIONS ON THE EPA REGISTERED LABEL.

DIRECTIONS FOR USE

PROWL H₂O herbicide applied according to this label, prior to weed emergence, will control annual bluegrass, volunteer fescue, and volunteer ryegrass in addition to the weeds listed on the PROWL H₂O herbicide label. It may be necessary to control weeds that have germinated prior to the application of PROWL H₂O with an alternative herbicide that has postemergence activity on those weeds. Weed control can be enhanced by using sequential applications of other registered pesticides.

PROWL H₂O may cause temporary injury to grass stands. Diseases, extremely cold weather, drought, extensive frost heaving, low or high pH, or salinity may weaken stands and make them more susceptible to herbicidal damage.

Apply at the beginning of significant fall rains and prior to weed germination. Uniformly apply 4.2 to 6.3 pints of PROWL H₂O per acre in 10 or more gallons of water per acre with ground equipment. The higher application rate should be used where heavy weed seedling or volunteer seedling infestations are anticipated.

PROWL H₂O treatments are most effective when adequate rainfall or overhead irrigation is received within 7 days after application. Effectiveness of PROWL H₂O may be increased by removal of excess straw and crop residue by such methods as crew cutting, propane flaming, or open field burning when local regulations allow.

CHEMIGATION APPLICATION

PROWL® H₂O herbicide may be applied through irrigation systems. Refer to the EPA registered label, PROWL H₂O herbicide EPA Reg. No. 241-418, for chemigation directions.
RESTRICTIONS AND LIMITATIONS

DO NOT apply more than 6.3 pints of PROWL H₂O per crop season. DO NOT apply if surface water is present. DO NOT apply when wind conditions favor spray drift. PROWL H₂O treatments are most effective when adequate rainfall or overhead irrigation is received within 7 days after application. Effectiveness of PROWL H₂O may be increased by removal of excess straw and crop residue by such methods as crew cutting, propane flaming, or open field burning when local regulations allow.

DO NOT apply this herbicide within 1 year (365 days) of harvesting grass hay.

DO NOT graze livestock in treated fields within 1 year (365 days) of application.

Rotational Crop Restrictions

Any crop labeled for PROWL H₂O preplant incorporated (PPI) use can be planted the same year without adverse effect.

For PROWL H₂O use rates up to 4.3 pints/acre: Wheat may be planted 12 months following a PROWL H₂O application. Other crops may be planted 18 months following an application of PROWL H₂O.

For PROWL H₂O use rates up to 6.3 pints/acre: Crops other than sugar beets, red beets, and spinach may be planted 18 months following application. Sugar beets, red beets, and spinach may be planted 24 months after application.

ENDANGERED SPECIES

This product is toxic to fish, and should not be used where impact on listed, threatened or endangered species is likely. Contact the Washington Department of Fish and Wildlife, National Marine Fisheries Service or U.S. Fish and Wildlife Service for information on listed threatened or endangered species (e.g., Bull trout, Chinook salmon). Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

CONTAINER DISPOSAL

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because the residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the internet from WSU at http://pep.wsu.edu/waste/wd.html or from WSDA at http://agr.wa.gov/. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

DISCLAIMER

This product when used on perennial grass grown for seed may lead to crop injury, loss, or damage. BASF Corporation recommends that the user and/or grower test this product in order to determine its suitability for such intended use. BASF Corporation makes this product available to the user and/or the grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower outweigh the extent of potential injury associated with the use of this product. The decision to use or not use PROWL® H₂O herbicide must be made by each individual user and/or grower on the basis of possible crop injury from PROWL H₂O, the severity of the weed infestation, the cost of alternative weed control, and other factors. BASF Corporation intends that because of the risk of failure to perform, or crop damage, that all such use is at the user’s and/or grower’s risk.

THIS LABEL FOR PROWL® H₂O HERBICIDE EXPIRES AND MUST NOT BE DISTRIBUTED OR USED IN ACCORDANCE WITH THIS SLN REGISTRATION AFTER DECEMBER 31, 2008.
Conditions of Sale and Warranty

The Directions For Use of this product reflects the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT PERMITTED BY LAW, BASF OR THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
